

DakStats sport software allows users to quickly save game files to be uploaded to [www.MaxPreps.com](http://www.MaxPreps.com) without having to manually reenter all of the game stats. The following guide describes how to export game files from DakStats and import them into MaxPreps.

## Exporting Game Files

1. Open DakStats.
2. Go to **File > Export Game** (or **Export Match** for volleyball).
3. Select the *Season*.
4. Select your *Team*.
5. Select the *Competition* to be exported.

*Note:* The current directory is shown at the bottom of the window. To change this location, click **Directory** and select the desired destination for the exported file (such as the Desktop). Remember this location when importing the file.

6. Click the dropdown arrow and select **MaxPreps (\*.txt)**.
7. Click **Export**.

Refer to the appropriate DakStats manual for the sport in use for more information about importing and exporting game files.

## Importing Game Files

1. Open an Internet browser and go to [www.maxpreps.com](http://www.maxpreps.com).
2. Click **Coach Login** in the top-right corner of the screen.
3. Enter your *Username* and *Password*, and then click **Login**.
4. Scroll over **Stats** in the top menu bar and click **Enter/Edit Stats**.
5. Click **Enter Stats** next to the desired game.
6. Enter the box score and click **Save & Import Stats**.
7. Click **Browse** to locate directory where the exported game file was saved, and then click **Import**.

For additional help with the import process, click **need help?** on the stat entry page.
